

MATTHEW HUCKE

New York, NY 10024

314.272.4284 | matt@mhucke.com | www.mhucke.com

OBJECTIVE

Seeking employment in a dynamic, high-tech environment that will challenge and make best use of my creative abilities and software development skills.

SOFTWARE

Server-side: PHP 4 & 5, Linux, Apache, MySQL, XML, Perl, Bash, JSON

Client-side: JavaScript/jQuery, AJAX, HTML/HTML5, CSS/CSS3

Content Management Systems and Tools: Drupal, WordPress, DokuWiki, Joomla, Git, SVN, Adobe Creative Suite, Google Analytics, SEO

APIs: Twitter, Flickr, Facebook, Instagram, Foursquare, Last.fm, Google Maps

RELEVANT EXPERIENCE

MHucke.com, New York, NY

Freelance Web Developer, January 2002 - Current

Developing websites for clients using LAMP and other current web technologies. Projects range from small business websites to corporate intranets.

Guerrilla Street Food (www.guerrillastreetfood.com), St. Louis MO

Freelance Web Developer, September 2012 - November 2012

A St. Louis food truck website, using a responsive design. The site was built with WordPress using a fully custom theme and custom plugins developed in PHP with Google Maps for daily locations and menus.

- WordPress
- PHP
- JavaScript/jQuery
- CSS/LESS
- Google Maps
- Responsive

Rock Me HipHop (www.rockmehiphop.com), North Bergen, NJ

Freelance Web Developer, April 2012 - present

A hip hop video site developed using WordPress with a fully custom theme and custom plugins. The site allows members to post music videos or sounds from YouTube and SoundCloud. The site allows users to create a member account to promote their brand by advertising their own shop or website. Members may also interact in comments via Disqus.

- WordPress
- JavaScript/jQuery
- PayPal Integration
- PHP
- YouTube API
- SoundCloud API

Laclede's Landing Merchant's Association (www.bigmuddybluesfestival.com & www.lacledeslanding.com), St. Louis, MO

Freelance Web Developer, February 2012 - present

The historic riverfront area of St. Louis that hosts a number of concerts and events. I have worked on the Laclede's Landing and Big Muddy Blues Festival sites. Both sites are developed with:

- Wordpress
- PHP
- JavaScript/jQuery
- CSS

Musformation (www.musformation.com & www.getmorefansbook.com), New York, NY

Freelance Web Developer, May 2010 - present

A music industry blog, which is powered by a WordPress and open source plugins. Custom theme and custom plugin development.

- Wordpress
- PHP
- Javascript/jQuery
- CSS

Development of a Facebook widget using custom JavaScript that allows a user to embed a music player on his/her wall. The player can have a single track or a playlist of songs.

Development of a Flash and PHP widget that enables bands to collect email addresses from their fans, in exchange for a free music track. Once the user has entered his/her email address, the email address is automatically stored in a CSV file and the user receives an email with download instructions for the music track.

Cranky Yellow, St. Louis, MO

Lead Web Developer, February 2009 - 2012

Developed the company's website and was the lead web developer on internal and external web projects, including Drawgasmic, Cranky Yellow Blog, and Star Clipper.

Drawgasmic was a large international art show that took place in St. Louis in July 2010. The system keeps track of the artists' profiles, memberships, art inventory, art sales, book sales and payments for entry fees. The script also collected contact information for artists on sites like DeviantART and Tumblr. I created the backend system for the event using:

- PHP
- MySQL
- jQuery
- PayPal

FukuFlea (www.fukuflea.com), St. Louis, MO

Freelance Web Developer, 2009 - 2010

A site that I developed that has been called "the unsocial social network." It enables users to join a network of people that add content anonymously or by creating an identity. The site was developed using:

- PHP
- MySQL
- Custom JavaScript for AJAX features

Musotik (<http://musotika.mhucke.com>), St. Louis, MO

Web Developer (Personal Project), 2008 - present

A music search engine I am developing that crawls the web for MP3s. The site pulls file lists, band bios, album/track listings, photos and videos from various internet sources to be displayed in one interface. First thrown together in 2008 and then rewrote in 2012 after a long hiatus. The site is being developed using:

- PHP
- MySQL
- JavaScript/jQuery
- APIs from Last.fm, Pandora, Musicbrainz, Yahoo, Flickr and more.

Vatterott College, St. Louis, MO

Web Developer, August 2006 - September 2007

I developed and managed the college's intranet system, which included document and lead management, using PHP, MySQL and JavaScript. I developed online class features using ASP.NET and integrated Google Maps into the online school.

Ohm Technologies, St. Louis, MO

Linux Administrator, September 2001 - October 2002

Built and managed Linux machines hosting web, mail, and database servers. These servers were used by about 45 people for their daily tasks. I developed websites for various clients, including STL Whole Sale Cars, an online used car auction site built with PHP and MySQL.
